

CASE STUDY:

Greenway Sewage Pump Station

Location

Greenway, ACT

Description

This sewage pump station was built to accommodate newly released blocks in Greenway ACT. Due to the close proximity of Lake Tuggeranong, this pump station had an off line emergency storage tank. Also in a separate pit was a magnetic flow meter to accurately record the instantaneous flow rates as well as totalized flow from the station.

Features

2 x 2.4kW pumps on VSD's,
Allen Bradley Softstarters,
Allen Bradley 12" HMI,
Allen Bradley MicroLogix PLC

Scope

Design, construction
